Manage your software licenses throughout the whole lifecycle
Influence and negotiate license agreements before signing
Analyse and manage your contracts and purchases
Instigate audit readiness assessments
Benefit from our 100% Australian SAM as a Service offering

SAVVY ORGANISATIONS

...know software costs and under-licensing risks can quickly spiral out of control if not carefully managed by experts who are familiar with the many software vendor programs.

Our focus is to drive the adoption and growth of software asset and license management (SAM) in Australia and New Zealand. We help organisations to proactively protect their assets and to realise substantial savings.

Fisher Australia practitioners have a unique blend of extensive supplier based experience and certification by IAITAM, the worldwide body governing the IT Asset Management profession.

Fisher Australia will defend you against vendor audit and build a robust license management program that meets your current and future business challenges.
